

Empowering Your Climate Classroom: A Workshop to Support Climate Learning (Grade 7/8)

Clean Foundation is offering a FREE 2-day workshop on teaching climate change for Grade 7 and 8 educators in Nova Scotia!

Our goal is to support educators to feel empowered to bring climate change into any classroom, to support youth leaders, and to create engaging climate education experiences using an inquiry-based lens.

During our 2-day workshop, educators can expect to:

- gain **foundational knowledge** in climate science, history, impacts and solutions by taking part in **interactive and hands-on learning** experiences
- become familiar and comfortable with **inquiry-based** learning
- identify opportunities for **cross-curricular** learning with a focus on renewed Grade 7/8 Climate Change outcomes
- Consider **Indigenous ways of knowing** including Etuaptmumk and Netukulimk
- leave with an inquiry-based **climate change lesson plan** to take back to the classroom
- receive a 'Teaching Climate Change' Resource Kit **valued over \$300!**

Educators will leave this workshop with the **confidence, tools, resources, and materials** to bring impactful climate change education into their classroom.
