PRACTICAL CLIMATE SUPPORT

Resilient Municipalities Coaching Services Program

We help municipalities with fewer than 30,000 residents incorporate climate considerations into the projects, plans and services they are already delivering—at no cost. The result? More resilient municipalities.

Infrastructure projects

Build infrastructure that performs today and prepares for tomorrow.

- Identify climate risks before design begins.
- Develop climate-resilient project requirements for RFPs.
- Strengthen funding applications, connect with potential project partners.

Housing and community growth

Support development that meets community needs and future conditions.

- Identify areas suitable for growth based on future conditions and local risks.
- Incorporate climate projections into project planning.
- Explore low carbon, energy efficient and climate resilient design approaches.

Emergency management

Prepare for climate-related hazards before they occur.

- Use climate data to identify local risks and vulnerable areas.
- Map access challenges and support evacuation route planning.
- Inform emergency management plans and strengthen public education.

Other areas of support

- Asset management
- Land-use planning
- Public engagement and education
- Greenhouse gas reduction initiatives
- Policy and by-law amendments
- Climate-related funding opportunities
- Regional collaboration

Not sure where to start?

We can help your municipality identify climate-related opportunities, connect you with resources and develop a practical roadmap to support your next steps.

Access support as needed, at no cost and with no ongoing commitment required.

Let's discuss your project to identify next steps.
